MEMORANDUM #2007-04

TO: Division Directors
Office Directors
Budget Officers

FROM: Jim Slate 

SUBJECT: Possible E85 Station in Greensboro Area

There is a statutory requirement for all State agencies to develop plans for petroleum displacement to meet a 20% displacement goal by January 1, 2010, (S.L. 2005-276). As part of our efforts to meet that goal, we should encourage all who use Motor Fleet Management Flex Fuel vehicles to use E85 fuel when it does not impede mission fulfillment of the Department.

We have received the attached correspondence from the NC Solar Center that indicates:

- plans for providing E85 fueling facility in Greensboro, and
- an invitation for staff who are assigned to vehicles in the Greensboro area to attend meetings discussing this fuel availability. This invitation is now out of date.

A list of staff assigned to these vehicles is attached. I regret that we could not get this out in advance of the meeting dates. However, it is helpful for employees in this area to know about plans to make E85 stations available in Greensboro. Contact information is also provided. We encourage you to review this list and make this information available to these employees as well as other appropriate staff. Your cooperation is appreciated.

Dear Petroleum Displacement Plan partners

We are meeting with station owners in the Greensboro area about putting in an E85 pump at a station in downtown that is close to UNC- G, NC A & T and City of Greensboro (who all have FFVs and would be willing to fuel at a station that is convenient to them). As illustrated in the attached spreadsheet of MFM leased vehicles we have identified additional FFVs that could utilize E85 in Greensboro should it become available at a service station. Please review the attached list for MFM vehicles assigned to your agency in Greensboro and forward following meeting invite to appropriate parties so that we can discuss and inform about potential opportunities in the Triad area. Thanks in advance for your help in getting the Triad's first E85 station going!

You're invited!

Please join local government and business fleet managers to learn more about current transportation technologies, practices and funding opportunities that will position your organization to be a leader in promoting cleaner air and a healthier environment.

June 11th 2:00 – 4:00 Upper Coastal Plain COG Office, 1309 Wesleyan Blvd. Rocky Mount, NC 27802

June 12th 10:00 – 12:00 Forsyth County Environmental Affairs, 537 N. Spruce St. Winston Salem, NC 27101

June 13th 10:00 – 12:00 Granville County Multi- Specialty Complex, 5662 Cornwall Road, Oxford, NC 27565

June 14th 10:00 – 12:00 Piedmont Triad Council of Governments, 2216 W. Meadowview Rd. Greensboro, NC 28404

What: Presentation and meeting about clean fuels and advanced transportation technologies

Why: Triad air quality concerns put our health and economy at risk. Come learn about transportation solutions and funding opportunities for Forsyth and Davie County local governments, businesses and non-profits.

Who: School bus transportation directors, solid waste and municipal fleet managers, utility fleet operators, private sector delivery and fleet operation managers, transportation fleet operators, planners and fuel marketers/station owners

Please RSVP with your attendance plans to cleantransportation@ncsu.edu. (with which meeting you will be attending) Follow up meetings to assess individual fleet opportunities are welcome.

This meeting is part of the Clean Transportation Advance Technology (CFAT) project at NC State University's NC Solar Center, a three year initiative funded by the NC Department of Transportation, NC Dept of Environment and Natural Resources and the Dept of Administration's State Energy Office to provide education, outreach and funding for emission reduction transportation related projects.
